(1.0+) [Vader's Blocky Programmer 'Blocks' Music Disc Pack](#) [16x] [JE]

This is a complete document that contains the full list of all the features and information available between the different versions of [Vader's Catty Programmer 'Cat' Music Disc Pack](#)

This pack **replaces** the texture for the '**Cat**' **Music Disc** with one that is **more cat-like**. For Programmer Art.

I hope to maintain this pack at my own pace and vision. So please be patient with any and all updates.

This project **supports Minecraft versions Alpha 1.2.2 — 1.21.1+ all in one file**. If it does not work or something seems broken on any particular version, please let me know via the comments section, DM, or email me at vaders.contact@yahoo.com and I'll try to fix it as soon as possible.

- **Are you accepting new texture contributions?**
 - No, not for this project. However, I am for some of my other projects.
- **Are you making a 32x version of this pack?**
 - No. Maybe in the future. Anyone is welcome to do so if they'd like, [go to the Google Docs page Legal Stuff section](#) for more information.
- **Are you porting this to Bedrock Edition?**
 - For now, no. I mostly play Java Edition, so I don't know how the file structure works. Maybe in the future.
- **Download is blocked for me, where else can I get it from?**
 - If a download is blocked for you, [go to Google Docs page Download section](#). There you can find all the places it's currently available from. If none of the mirrors work, please tell me of another place I can host the file that works for you.
