

Day X/31 - \$X/\$10K Client Revenue

? Who You Are Now vs Who You Want to Be ?

- Now:
 - w: I am broke, I have no influence in the world. I have no money and power to do the things I want and meet the people I desire to meet. I don't have the money to buy the cars I want, the clothes I want, the watches I want to buy. I have not made myself an income that allows me to live wherever I want and to travel whenever I want. My lack of money keeps me from doing things for the people I love.
 -
- Who You Want to Be:
 - This is the most important thing in my life. Who You Want to Be: I want to be a man without limitations. I want to be the person that people can rely on and feel safe that I have things figured out. I want my loved ones to feel safe when they know I will always be there for them when the chaos occurs. I want to be a man without financial limitations that can purchase anything for myself and for the ones I love. I want to be the man that goes through the world with power and confidence.
 -
 -

Your Reason Why

- In the chaos that is coming, the weak people will go extinct. If I don't have the money and power when the time has finally come, I will get wiped out. My family will get wiped out. And it will be on me. It will be my fault because I could not make enough money to save us from slavery. I need to make this happen so I eventually can save myself and my family from slavery.
 -
-

G Work Checklist

- Set a binary, tangible goal
 - Pick an attitude
 - Hydrate, Caffeinate, Get the blood flowing
 - Remove distractions
 - Set a challenging timer and try to beat it
 - Get started
 - Evaluate afterwards
-

Day - 24.10.2024

- 8.30 - wake up.

- 21.30 - 22.30 - Shower, chill with gf
- 22.30 - 23.00 - Sleep

GWS Reflection:

What tasks/objectives did I demolish?

- Don't skip any fields...
- All mandatory classes; math, geography, physics, and English
- Also managed to write my whole English + math homework in school - GETTING FASTER
-
-

Problems/mistakes encountered?

- Don't skip any fields...
- Slipped on a banana left by my matrix enemies, hit my head, and am now paralyzed
-
-

Solutions to each mistake/problem?

- Don't skip any fields...
 - Kill my matrix enemies next time I see them (if I'm even able to see them)
 -
-

GWS #1

- Sign up to linkedin sales navigator
- Send 15 dms
- Continue with AI - Rewatch module 1 & 2
-

GWS Reflection:

What tasks/objectives did I demolish?

- Don't skip any fields...
-
- Was very hard to sign up for linkedin premium, took ages to do it. Was issues with my account, tried another, then had my girlfriend to sign up. Took 40 minutes to sort it out which was frustrating but sent the outreach messages but did not have time for the course material.
-

Problems/mistakes encountered?

- Don't skip any fields...

- Had to solve the issue with linkedin sales navigator, took to long to do so but it's solved now.
-
-

Solutions to each mistake/problem?

- Don't skip any fields...
- It's solved.

-
- GWS #2 11.10 - 13.10
 - Continue with AI - Rewatch module 1 & 2
 - Implement all the action steps in the course
 - GWS #3 15.00 - 17.00
 - Finish module 2 and implement all the steps to make a finished scenario
 - GWS #4 18.15 - 20.00
 - Finish 4 videos on module 2 and implement all the action steps

GWS Reflection:

What tasks/objectives did I demolish?

- Don't skip any fields...
 - GWS #2 - I did setup the integration in make. I extracted the leads from phantom buster and I setup the integration with anymailfinder.com to find email addresses. I did not finish all the videos on module 2 since I ran into issues.
 - GWS #3 - Doesn't even really know what I have been doing for the last 2 hours. It's extremely complicated and it takes long time for me to learn but I am working as effectively as possible. Doesn't just feel like it when it takes such long time.
 - GWS #4 - Finished the entire course. Implemented all the action steps and I will begin to warm up my emails to use for my projects.

Problems/mistakes encountered?

- Don't skip any fields...
 - GWS #2 - The same thing I have encountered before happened. The headline in the http module did not work, even though I have done exactly the same thing as the video.

- GWS #3 - Ran into another issue that took 40+ minutes to solve, some issue with the coding. Felt frustrating but never gave up and made it out eventually.
- GWS #4 - Didn't face any problems this time, worked effectively and focused the entire time.

Solutions to each mistake/problem?

- Don't skip any fields...
 - GWS #2 - I asked for help for yesterday but did not get a good answer so will try to ask someone else, and ask their support to see where the issue is.

End day review:

Overall problems/mistakes throughout the day?

- *I could've been 2minutes faster with task #1*
- Today I did not do everything I wanted to do. Even though I did not waste time, I still feel like I am not as efficient as I need to be. I work too slowly.
-

Solutions to each mistake/problem?

- *Use timers for each task and try to beat them...*
- To work more efficiently and to achieve more during my work hours, I need to set bigger and more urgent targets for each of my work sessions. If I think I can achieve x within one hour, always aim to hit 2x.
-
