WeVideo in the Classroom (10pts)

General Description: In today's digital world, video creation tools, such as WeVideo, provide an engaging platform for delivering and sharing content material for teachers and students.

(Must Complete All Levels)

Level 1	Teacher-made videos are created as a means of content delivery using WeVideo. These videos can be created to introduce content, to provide content review opportunities or as part of a flipped/blended learning environment.
Level 2	Students share their research and learning by creating multi-media presentations using the WeVideo platform. Storyboards are used for planning and preparation and rubrics are provided for grading purposes. (Don't forget to make use of greenscreen opportunities supported by your school librarian!)
