

Candy Cane White Chocolate Muddy Buddies

9 cups Chex cereal (I used a combo of rice and corn Chex)

6 ounces [candy cane candy melts](#)

6 ounces plain candy melts (I used pink because that's what I had, but white or red would work great too)

2 cups powdered sugar

5 full size candy canes (or the equivalent amount of mini candy canes)

12 Hershey's Candy Cane Kisses, chopped into pieces

Divide the Chex evenly into two large bowls. Place three of the candy canes in a plastic bag and break them into small pieces using a rolling pin. Divide them evenly between the bowls of Chex. In a food processor or blender, pulse the powdered sugar and two of the candy canes, until the candy canes are ground into fine pieces, and set aside. Melt the different colors of candy melts separately in the microwave at 50% power at 30 second intervals, stirring in between, until smooth and melted. Pour into the bowls of cereal and toss to coat evenly. Toss with powdered sugar and chopped Hershey's Kisses. Let cool and harden before eating.
