Abstract

The abstract should briefly present the background/problem, state of the art and gap/novelty, objective, method, main measurable results, conclusion, and key implication. If relevant, state the contribution to the SDGs supported by the results. Do not use citations. Write 150–300 words in one paragraph. [Arial 9, single spacing].

INTRODUCTION

The Introduction explains the partner/community problem based on relevant facts and presents a brief state of the art from previous studies or similar community service. Clearly identify the gap, justify the novelty/contribution of the present program, present the proposed solution, and end with the objective(s) of the activity. Write in integrated paragraphs. [Arial, 11].

METHODS

The Method states the approach used and why it is appropriate for the partner/community problem, such as Asset Based Communities Development (ABCD), Participatory Action Research (PAR), Community Based Research (CBR), Service Learning (SL). Describe the main implementation stages, participants/partners, evaluation tools, success

indicators, data collection, and analysis when applicable. Add a flowchart or diagram if it clarifies the process. [Arial, 11].

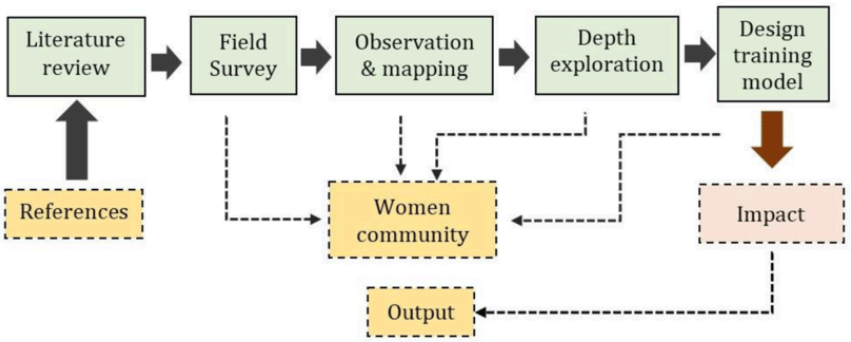

Figure 1. Example Diagram

RESULTS

The Results present the implementation process and the main measurable outcomes in relation to the objectives and program success indicators. Report relevant participant characteristics and evidence of changes or impact produced by the program. Use tables or figures only when they clarify the results, and explain them in the text. [Arial, 11].

Example of Table:

Table 1. Description of Participant Characteristics

Describtion	Category	Frequency	%

Table 1 above is explained and described comprehensively in the following section.

Table 2. Description of Activities

Documentation Photo	Description

Table 2 above is explained and described comprehensively in the following section.

Table 3. Descriptive Statistics

N	Minimum	Maximum	Mean	Std. Deviation

Table 3 above is explained and described comprehensively in the following section.

Table 4. Pre-test and Post-test Results

Program Achievement Indicators	Pre-test (%)	Post-test (%)	Improvement (%)

Table 3 above is explained and described comprehensively in the following section.

DISCUSSION

The Discussion interprets the main findings in depth by considering the appropriateness of the method, the importance of the findings, and their meaning. Compare the findings critically with relevant and recent theories, studies, or similar programs to show whether they support, extend, differ from, or provide a new contribution to previous findings. Explain the theoretical and practical implications, including relevant SDG contributions when supported by measurable evidence, and provide recommendations for sustainability or scalability. [Arial, 11].

CONCLUSIONS

The Conclusion directly answers the objective(s), states whether and to what extent they were achieved, and highlights the main or new findings and their implications. Briefly state limitations and recommendations supported by the findings. Do not merely repeat the Results. Write in paragraph form. [Arial, 11].

ACKNOWLEDGEMENTS (IF REQUIRED)

Acknowledge individuals or institutions that provided funding or other significant support but do not meet the criteria for authorship. [Arial, 11].

ETHICAL CONSIDERATIONS

For more details on how to report this, see "Publication and Research Ethics": https://jim.unisma.ac.id/index.php/PENADIMAS/pages/view/Publication%20and%20Research%20Ethics

State the ethical approval information when required, including the ethics committee, approval number, and year. If ethical clearance is not required, write “Not applicable” and, where relevant, state the consent or ethical compliance applied. [Arial, 11].

CONFLICT OF INTEREST

Disclose any personal, institutional, or financial interests that could influence the article. If there is no conflict of interest, state: “The authors declare no conflicts of interest. [Arial, 11].

FUNDING

The names of the funding organizations should be written in full. If there was no financial aid, it should be reported that "This research did not receive any financial support". [Arial, 11].

AUTHOR CONTRIBUTIONS

Briefly state each author’s specific contribution to the activity, data analysis, and manuscript preparation to ensure clear academic accountability.

Example: Ahmad Fauzi conceptualized the study and developed the research design. Dina Rahmawati collected and analyzed the data and prepared the tables. Budi Santoso interpreted the findings and drafted the discussion section. All authors contributed to revising and approving the final manuscript. [Arial, 11].

DECLARATION OF AI USE

During the preparation of this manuscript, the author(s) used [name and version of AI tool/service] for [specific purpose]. The author(s) reviewed and verified the resulting output and take full responsibility for the accuracy, originality, and integrity of the final manuscript.
If no generative AI or AI-assisted tools were used, authors may state:

The author(s) declare that no generative AI or AI-assisted tools were used in the preparation of this manuscript. [Arial, 11].

REFERENCES

Use at least 25 references, with more than 80% from primary sources and at least 60% from reputable international journals. Use references published within the last 5 years, include DOI where available, and ensure every in-text citation matches the reference list. Use APA Style (7th edition) consistently with Mendeley. [Arial, 11].
Example of References using APA styles:
