The Inclusive 365 team wrote [*Inclusive Learning 365: EdTech Strategies for Every Day of the Year*](#) which offers 365 strategies for implementing technology to design inclusive experiences. Educators across the world are working to design individualized instruction that empowers every student to become experts at learning. Technology and instructional interventions designed to support students with disabilities often eventually become mainstream and used by the masses. These practices provide a pathway for designing inclusive, equitable and accessible educational experiences that meet the needs of every individual learner.

Session Descriptions

Tuesday, April 25th 8:15 a.m.-9:45 a.m.

General Session

Creating a Culture of Inclusivity: A Quest

We're going on an adventure! Learners across the land are in need of an education designed and delivered in a way that respects and honors their individual abilities. However, the path through contemporary education is wrought with traps, barriers, and pitfalls. Fortunately, learners have you to help guide them as they work to unravel the mystery of their own bodies and minds and help them discover a treasure trove of maximum potential. And you are not alone. Gather your fellowship and work together to learn strategies for how to develop an environment where every educator adopts a mindset based on the principles of inclusive design.

Decipher, decode, and decrypt insights on how the language we use influences actions. Learn how to replace, rather than add, actions to create sustainable and systemic practices.

Inclusion is coming.

We all have a role to play in this quest for inclusivity. Join us on this journey of discovery.

Tuesday, April 25th 10 a.m.-11:30 a.m.

The Quest for Inclusive Literacy Strategies

It takes more than magic spells and potions to help someone learn how to read and write. Join the authors of Inclusive 365 as we explore practical strategies you can immediately integrate into your learning environments to promote inclusive practices with a focus on increasing skills related to literacy. Strategies, and potential tools to implement those strategies, will be discussed. Leave with the ability to

immediately apply what's been learned through a Wonderfully Inclusive Scavenger Hunt (WISH).

Learning Outcomes:

- Participants will identify three strategies to improve and support reading abilities.
- Participants will identify three strategies to improve and support writing abilities.
- Participants will identify three tools that can be used to improve and support literacy skills.

Tuesday, April 25th 12:45 p.m.-2:15 p.m.

The Quest for Inclusive Research and Study Skill Strategies

Everything in the universe is knowable if we develop the skills to unlock potential. Individuals with strategies for how to regulate emotions, locate and verify information, and execute actions to keep themselves organized can learn how to approach, navigate, and solve any problem in their path. Join the authors of Inclusive 365 as we explore practical strategies you can immediately integrate into your learning environments to promote inclusive practices with a focus on researching, studying, executive function, and social emotional learning. Strategies, and potential tools to implement those strategies, will be discussed. Leave with the ability to immediately apply what's been learned through a Wonderfully Inclusive Scavenger Hunt (WISH).

Learning Outcomes:

- Participants will identify three strategies to improve and support research and studying.

- Participants will identify three strategies to improve and support executive functioning.
- Participants will identify three strategies to improve and support social emotional learning.
- Participants will identify three tools that can be used to improve and support researching, studying, executive functioning, and social emotional learning.

Tuesday, April 25th 2:30 p.m.-4 p.m.

The Quest for Inclusive STEAM and Professional Development Strategies

Like a wizard tapping into magical auras to craft the perfect spell, individuals in the real world can learn how to master the properties and principles of science, technology, engineering, art, and mathematics to become critical thinkers and innovative creators. Educators can guide others on their quest by adopting a mindset of consistent improvement and every day learning. Join the authors of Inclusive 365 as we explore practical strategies you can immediately integrate into your learning environments to promote inclusive practices with a focus on science, technology, engineering, arts, mathematics, and professional development. Strategies, and potential tools to implement those strategies, will be discussed. Leave with the ability to immediately apply what's been learned through a Wonderfully Inclusive Scavenger Hunt (WISH).

Learning Outcomes:

- Participants will identify three strategies to improve and support skills related to STEAM.
- Participants will identify three strategies to improve and support skills related to professional learning.

- Participants will identify three tools that can be used to improve and support skills related to STEAM and/or professional learning
