

## PPA Tour Pro Main Draw & Seeding Process

### Automatic Bids:

PPA Contracted Pro Players with Gold Card status receive automatic bids into the Main Draw for Pro Singles events. PPA Contracted Pro Player teams with Gold Card status (both players of a team must be contracted with Gold Card status) will receive automatic bids into the Main Draw for Pro Doubles events.

The PPA Seeding Committee may also choose up to two wild card players to be entered into the main draw.

Gold medal winners from the Pro Events from the PPA Challenger Tournament Series may also receive automatic bids into the Main Pro Draws.

Once the Main Draw selection process has been finalized, the committee will determine the size of the pro draws and will set the TBD slots for each pro draw. Each qualifier event will then have the corresponding number of winners to qualify into the main draw.

Winners are determined based on the final standing in the qualifier events based on 1. number of wins and 2. point differential percentage.

### Seeding:

#### Main Draw:

Seeding and randomization takes place after the main draw automatic bid spots and committee seeds have been filled. As an example for a 48-team sized draw with 8 qualifiers, randomization takes place as follows:

Seeds	Rule
1-2	Stay the same
3-4	Randomize
5-8	Randomize
9-12	Randomize
13-16	Randomize
17-24	Randomize
25-32	Randomize

33-40	Randomize
41-48	Filled via Qualifier

Qualifiers:

Qualifier events are seeded by PPA points.

Qualifier winners are determined by number of wins and by point differential percentage of the qualifier rounds.

Qualifier winners will be placed into the main draw based on their PPA points ranking (not by how they performed in the qualifier rounds).
