

Advanced Welding and Shipfitting 4

883 ADVANCED WELDING AND SHIPFITTING (AWS) FOR MARINE TRADES 4

Term: FY Grade:12 4 Credit Electives

Prerequisite, Successful completion of Advanced Welding and Shipfitting 3

This full year course may be completed off site through an internship opportunity at Electric Boat or another participating business. Students must be finished with their graduation requirements or on track to complete them by the first quarter to continue in this program. Through the internship, students will begin preparation for post-graduation employment and will be assigned a mentor to refine and improve their workplace skills. Students will receive various industry certifications such as certification from the American Welding Society, NCCER, OSHA 10, Solidworks and also receive college credit through New England Institute of Technology. Students will need to pass a hair follicle drug test to be eligible for internship opportunities.
