

Nature's Wealth – *Jenny Patient/Janet Wood Tune: I love to go a-wandering*

I love to watch the swallow skim
The river in its flight
But global heating means it can't
Find food when it arrives
An insect armageddon means
We'll never get the chance
To watch when day is growing dim
The glow worm's silvery dance

**Let's stand, let's sing, let's shout
And spread the message everywhere
Let's stand, let's sing
And save our planet home**

The seagull whiter than the foam
The fish that dart beneath
Are fast becoming history
No future to bequeath
We're feeding fish to factory fowls
And never get to meet
The lowing cattle coming home
The goats upon the heath

We need a climate and nature bill
Let's write to our MPs
Tell all our leaders what we need
Is Agroecology
Come all you people, rise up now
The time is running out
Let's be a friend to nature's wealth
The only kind that counts
