CRUNCHCHUTE FURSUIT FULL PRICELIST

Pricelist (updated march 2026):

Toony head:

Starting at 1700€ (up to 1 main + 1 accent fur color included in price)

Head lined with scuba foam, neck not lined. Mouth and eye sockets lined with fleece.

Static jaw only.

3D follow-me eyes or flat 2D eyes.

Extras:

velcro tongue 10€ (one tongue included, extra can be a different length, color, etc.)

velcro eyelids 10€

Asymmetrical design +50€ (design that needs the entire head to be patterned)

Simpler heads, such as for birds (where there's a lack of ears, teeth, nose etc.) will be priced differently, starting at 1500€.

Custom build heads (not using my usual foam patterns) +100€

Example: a lizard head (simpler) using my usual patterns would start at 1300, but one built from a newly designed one would start at 1400.

4 finger handpaws (pre-existing sewing pattern):

Starting at 200€

Minky or fleece pawpads, lightly stuffed +10€.

(Faux leather or other material possible, unstuffed.)

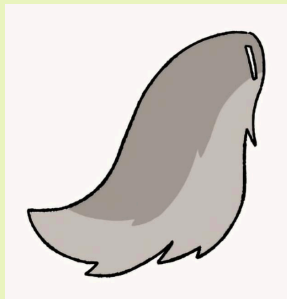

Opening lined with minky or fleece, possible to add cuffs similar to a hoodie for a tighter fit (needs detailed measurements!)

Full lining (cotton) or stuffed finger pillows.
claws 10€ (8 fingers) any size
dewclaw 10€ (just cosmetic, not used as 5th finger)

Special handpaws:

Starting at 220€
Custom pattern for different species, 5-fingered paws, etc.
Pads +10€.
Claws + 10€

Tail:

Nub starting at 60€
Long starting at 120€
Extra long starting at 170€
Tails thin at the base have 2 elastic belt straps sewn in.
Thicker tails will have a circle of eva foam at the base to keep the base flat. Belt hole will be hidden.
Tail base design (applicable with a hidden belt loop) + 20€ ex. bone, symbol.
By default, black, a neutral color or a color matching the fur fleece circle will be used at the base.
Applies to bird-like tails as well. Odd species with more complicated tails will be charged starting at 170€ for complexity even at a smaller size (think insect, fish tails with fins, skunk tails, etc.).

Note - a bigger tail might need to be shipped separately because of the size and parcel size limits. Extra shipping would be calculated, if needed.

Extras:

Horns (fleece, minky, other), foam sculpted or stuffed - starting at +20€.

Small nub horns +10€.

Hair tuft + 10€

Bangs from +30€

Full mohawk +50€ (foam base)

If multiple smaller tufts need to be added, price will be discussed further.

Wearable accessories - hats, crowns, eyepatch, etc. are available to be ordered, priced case by case.

Plush props - case by case.

Wings: medium size, held by elastic straps. Starting at 200€, custom shape. Due to shipping size limits I will only make soft style wings that can be folded into a box, with an upholstery foam base or similar.

Piercings: I can make soft sewn piercings made from minky, "neoprene" or shiny lycra. Types: ball +3€, loop +5€, spike +3€, can be combined. Piercings are sewn on, with the exception of a nose ring which can be made removable on a pickable nose.

Markings:

Stripes 2€

Spots 5€

More complicated marking designs might be extra (ex. star, pawprint,...) 6+€

These are counted as stand alone, full markings, that need to be carefully handsewn and generally need more work - I usually include them in the main price unless there's several repetitive ones (such as tiger stripes, for example) or something complicated (for example a swirl marking, or african wild dog style spots).

Extra fur colors: +65€ per color (can vary, will be discussed). For small areas where half the amount is needed - +30-40€

Fur colors: note that I can only work with furs available to me. If a buyer has their furs picked beforehand, I cannot guarantee I will be able to source these furs. The current options are efutro, BigZ(stoffhummel), miemie and mofumofu. I can also source furs from some local stores. If the buyer specifically wants furs from other sources, they must be willing to pay for the extra shipping, and accept the wait time! Alternatively, the buyer can purchase and ship the furs themselves, but also has to pay for the extra shipping. Note that furs shipped from outside of Europe can take several weeks to arrive! The shipment time is counted as extra and isn't

included in the estimated time given to a commission. The commissioner will be informed about this, or about any changes in shipping.

All prices in the document are in euros (€).

Build notes: I make my bases by hand out of upholstery foam. These are glued with hot melt glue. Eva foam is used if needed, it might be glued with contact cement but only in places that do not come in contact with the face to minimize any chance of breathing any fumes. I currently do not work with 3D printed bases or bases from other makers. I do not line my necks. I both hand sew and machine sew my parts. Follow-me style eyes are glued in before the furring is done and cannot be taken out easily. 2D eyes are glued on top of the furred heads, caution while brushing is advised (to not scratch the plastic material or tug at the corners, loosening the glued parts). Usually the mouth opening rims (lips) are sewn, then a lip liner is glued on the bottom jaw lip. I also glue on the eyeliner, which I make out of soft velcro, so it's suitable for eyelids. Eyebrows or details like scars can be sewn in like markings (if fur is used) or glued on after (if fleece is used). I don't use airbrushing. I prefer not to use felt, as it's prone to pilling. A finished head weighs usually around 900 grams, can be more with larger ears or more hair fluff. I do not offer electronic parts in my suits.

Shipping: Shipping is calculated manually based on buyers address, the weight of the package and amount (if multiple packages are needed if items have to be sent separately) for premades, for commission an estimate is used.

Current rough estimates are 40€ for European countries, 180€ for USA (+ 15% fee for import, paid by the buyer) per package.
