

UNITED NATIONS PLANETARY DEFENSE COUNCIL

EMERGENCY SESSION DOSSIER - CLASSIFIED

DOCUMENT CODE: UN-PDC/0009-SOL

DATE: 2026 CE

SUBJECT: First Confirmed Extraterrestrial Contact – Foreign Power Requesting Access to Earth's Mineral Resources

I. OVERVIEW

On April 11, 2025 CE (Earth calendar), the United Nations Space Surveillance Network tracked several **non-terrestrial vessels** entering Earth's orbit. These objects exhibit controlled deceleration, gravity-defying propulsion, and zero detectable emission trails—clearly indicating **technology far beyond human development**.

Within 72 hours, an **encoded signal burst** was received by satellite relay and translated via global linguistic AI. The message was brief, precise, and **unambiguously diplomatic** in nature.

II. TRANSMISSION EXCERPT – FOREIGN ENTITY "The Galactic Empire"

"People of Earth.

We are emissaries of the **Galactic Empire**, a sovereign, multi-system government beyond your star.

We have detected within your planet's crust a substance of immense value and rarity—a mineral essential to peaceful infrastructure projects across our territory.

We offer you a diplomatic relationship founded on **technological advancement, peace, and shared growth**. In exchange for access to select deposits of this resource, we are prepared to provide:

- Medicine capable of eradicating disease
- Power systems beyond your current energy capacity

- Enhanced spaceflight, communication, and environmental stabilization tools

We seek peaceful cooperation with your planetary government. We await your answer.”

This message was relayed from a **massive orbital structure**, which has since entered geostationary orbit above the southern Pacific Ocean. No additional communication has followed as of this writing.

III. ANALYSIS OF THE OFFER

The entity claims interest in **unidentified mineral deposits**—presumed to be **recently detected crystalline anomalies** deep within the Earth’s crust. These formations were first reported by geological institutes as part of unrelated tectonic and seismic activity studies.

Characteristics:

- Emit harmonic frequencies when energized
- Found in low concentrations across major fault lines
- Currently unexplained by terrestrial geology

The Empire’s interest suggests a potential **extreme energy or technological value**.

IV. EARTH'S TECHNOLOGICAL DISPARITY

The Galactic Empire has demonstrated:

- Orbital mobility with zero reaction mass propulsion
- Direct signal communication bypassing Earth’s satellite encryption
- Implied artificial gravity or inertial dampening (deduced from vessel movement)

No existing Earth nation possesses technology within several centuries of this sophistication. In essence, we are dealing with a **Type II or III civilization** (per Kardashev Scale), while humanity remains at **Type 0.7**.

V. IMMEDIATE RISKS

Risk	Description
Technological Dependence	Earth may become reliant on alien infrastructure or aid, risking sovereignty
Resource Exploitation	Without knowledge of the mineral's value, Earth may be surrendering a strategic asset
Cultural Destabilization	Disclosure of alien contact may spark panic, social collapse, or mass misinformation
Military Vulnerability	Earth lacks planetary defense or shielding capabilities

No military threats were made by the Empire, but **the implicit power imbalance suggests coercive leverage is possible** should Earth refuse.

VI. STRATEGIC RECOMMENDATIONS

A. Global Unity and Control

- **Immediate establishment** of the **United Nations Planetary Response Authority (UN-PRA)** under Security Council leadership
- Prohibit all individual nations from engaging with the alien entity independently
- Create an international legal framework for extraterrestrial diplomacy and technological integration

B. Scientific Review Panel

- Task leading physicists, geologists, and defense analysts to assess:
 - The nature and risk of the crystal deposits
 - Potential energy output, instability, or weaponization potential

- Long-term ecological effects of extraction

C. Controlled Contact Policy

- Accept continued diplomatic communication, but **refuse resource extraction until conditions are met:**
 - Full disclosure of the mineral's use
 - Independent Earth study period
 - Guarantee of sovereignty and legal protections under Earth-based treaties

VII. CIVIL COMMUNICATION STRATEGY

- **Disclosure Delay Period (DDP):** Public will not be immediately informed. Media blackout enforced for 96 hours.
- **Tiered Announcement Plan:**
 - Tier 1: Inform scientific and security communities
 - Tier 2: Release general statement on "extraterrestrial signal detection"
 - Tier 3 (only if safe): Public briefing on the existence of peaceful contact

VIII. UNIFIED DIRECTIONAL STATEMENT

Pending further review, Earth will:

1. Acknowledge peaceful first contact
2. Demand transparent information about the mineral in question
3. Delay any extraction agreements until full scientific and ethical review is completed
4. Require that no military presence or orbital deployment occur within Earth's atmosphere or surface without prior UN consent

IX. WORKING THEORY

Some analysts theorize the mineral may serve as a **reactive energy conductor** - possibly as part of high-scale energy arrays, weapon systems, or faster-than-light propulsion cores. The Empire's insistence on Earth's deposits implies scarcity or recent depletion elsewhere.

Until more is known, Earth must proceed as if this mineral is **strategically priceless**.
