

Kahoot

Description: Kahoot is a quiz based system that allows teachers to make content fun for students to study and learn (Edwards, 2022). Kahoot houses a lot of content so teachers can search for the information they need for lessons and create a quiz and study game associated with the information they chose.

School Uses: Kahoot is great for the classroom because it is a study tool. Teachers can also see the results of quizzes and track their student's progress (Edwards, 2022).

How I use it:

I've created a quiz on impressionist artists.

Where to find it:

Kahoo.com

How much does it cost?: There is a free version teacher can use. The free version has limited images that can be used. The upgraded versions range from \$17-\$79/month. The upgraded versions offer more images and features.

Why use it?: Kahoot is an engaging way to integrate technology into the classroom.
