

Agribusiness Program of Study

Description:

The Agribusiness program of study teaches students to apply the economic and business principles involved in the sale and supply of agricultural products to a wide range of careers across the industry. In addition to building foundational knowledge of finance and marketing principles as they apply to agricultural businesses, courses in this program of study teach students essential leadership, management, and communications skills to help them succeed in future agribusiness careers. Upon completion of this POS, students will also be prepared for advanced business courses at the postsecondary level.
