February Transportation Report

- We are still short 1-full time and 2-part time drivers. We are having a very difficult time covering all the activity and athletic trips and still being able to run regular afternoon bus routes to get the students home.
- Two of our maintenance trucks are currently down. One has a problem with the transmission and the other one has a blown motor. The one with the blown motor is our Tommy truck (truck with a lift gate on the back) and is 23 years old. At this time, I am not planning on spending any money to fix the Tommy truck. My plan is to make do until we can get the new maintenance truck that we ordered and fix the truck with the transmission problem and install a lift gate on the back of that truck.
- School Bus Driver Appreciation Day is February 22, 2023.
