

AAPM WGICR communication reference (internal use only):

Appendix 2: Application for Inclusion in the AAPM Ionization Chamber Registry (ICR) Complying with AAPM ICR Performance Prerequisites

To: Chair, Ionization Chamber Registry Working Group (WGICR) of the AAPM Calibration Laboratory Accreditation (CLA) Subcommittee

From: _____
(Representative name / Role / Company)

Date (MM/DD/YYYY): _____

Technical contact and email address: _____

In submitting this document, we believe that the ionization chamber identified below meets the requirements for Ionization Chamber Performance as defined in: "Performance prerequisites and required information for inclusion on the AAPM's ionization chamber registry".

The manufacturer hereby requests that the ionization chamber be evaluated for inclusion in the AAPM's ICR complying with the AAPM dosimetric performance requirements.

Chamber Serial Number (initial): _____

Model Number / ID (Name): _____

Type of ionization chamber (cylindrical or parallel-plate): _____

Intended linac beam modality (photons or electrons): _____

Chamber Manufacturer (if different from Company specified above): _____

Please attach a schematic drawing of the ionization chamber.

Note that after this form is submitted a representative of the WGICR will contact the technical contact indicated above to request data to verify compliance with the ICR performance prerequisites. Data must be submitted using the data submission template provided by the WGICR representative.
