

How to make a Diy Butter!

Thursday 3 september 2020

Ingredients:

2 x 500ml of butter cream.

- Optional- pinch of salt.
- Glass jar

Instructions:

- Add a cream to the jar. (make sure the lid is thigh so well, so when you shake it it won't spell out)
- Add some (Clean) Marbles
- Shake
- Keep shaking u to (20 minutes)
- When it starts to sound watery, check the jar.
- When there is no more liquid, put it on the fringe.

How we did our one in my Group:

My Group also made Diy butter, and our one didn't really look like butter because it was quite watery and it was not that orange like normal butter. While we are

doing it my hand really hurts when you shake it, because you have to shake it up down, so it will turn up good. Then when our one was starting to look like butter we were so surprised because for the first time we made butter by yourself. Then our teacher put it in the fridge so it might be turned to orange. Then when the lunch bell finished we washed our hands and, our teacher Mrs Odean, made some toast and we put the butter on it and it was so yum.

This picture is our teacher Tau, and her butter really looks really good. !!!
