Put the Title of Paper Here, in Capitalize Each Word without Line Separation

Put authors name here¹, Put author name here¹, Put author name here¹, Put author name here², Put authors name here²

¹Put author's affiliation here, complete with address, postal code, and country

²Put author's affiliation here, complete with address, postal code, and country

Note: because of double-blind review policy, please only put authors' information (including in header and footer) after accepted at peer review process.

Abstract. Abstract with no more than 250 words should be supplied to reflect the content of the paper. A concise and factual abstract is required. The abstract should state briefly the context of the problem (background), purpose/aim of the research, the principal methods, the results and major conclusion (contribution). An abstract is often presented separately from the article, so it must be able to stand-alone. For this reason, References/citation should be avoided. Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.

Keywords: Alphabetically sorted; Capitalized first word; From A to Z; Maximum 5 keywords; Sentence case; Separate by semicolon (;) between keyword

1. Introduction

Provide an adequate background, context of the problems based on the literature review. State the objectives of the work and emphasize the originality (state of the art).

Citation more than one cited article/reference should be written in order by year (Kusrini *et al.*, 2021; Azhikannickal and Uhrin, 2019; Berawi, 2017; Chung *et al.*, 2016; Gompers, Kaplan, and Mukharlyamov, 2016; Gromacs Manual 4.5.4, 2011; Cheng, 2010; US EPA, 2010; Mamat *et al.*, 2009; Gang-Ji, 2008).

2. Methods

The methodologies of community service include: Participatory Action Research (PAR), Community-Based Research (CBR), Service Learning (SL), and ABCD (Asset-Based Community Development).

2.1. Size of Dataset

Formulae should be numbered consecutively throughout the manuscript as Equation 1, and Equation 2. In cases where the derivation of formulae has been abbreviated, it is of great help to the reviewers if the full derivation can be presented on a separate sheet (not to be published). All equations should be stated in text following the number.

¹Corresponding author's email: name@ai.ue.oa, Tel.: +00-00-000000; Fax: +00-00-000000

Formulae should be mentioned in text, centered and numbered (see equation 1).

$$f = \frac{1}{2\pi\sqrt{LC}} \quad (1)$$

where L is the length of river, C is the coefficient of runoff (see equation 2).

$$P_{Total,Gen} = \sum_{j=1}^m P_{Gen_j} \quad (2)$$

where P_{gen} is the generated precipitation

2.1.1. ORF primary frames

Table should be original and editable text (not as embedded figure), no vertical border (only horizontal border and bold), use single line spacing, font size 10 as shown in Table 1. Tables should be centered and numbered accordingly.

Table 1 Number of receptors in each container

Experiment	Container	Receptor
1		
2		
3		
4		
5		

Short explanation regarding the Table's meaning and significant – Experimental methods can be supported with a diagram, clearly shown the process and completed with legend, scale/dimension if required (Figure 1).

Figure 1 Experiment set-up and apparatus

3. Results and Discussion

3.1. System Performance Benchmark

Results should be clear and concise. Show only the most significant or main findings of the research. Discussion must explore the significance of the results of the work. Adequate discussion or comparison of the current results to the previous similar published articles should be provided to shows the positioning of the present research (if available).

3.1.1. Memory performance result

Please send your figures both embedded in your word file and in the original format (not embedded, as supporting file during online submission). For printing a vector format is preferred. In case of photos etc. a resolution of 300 dpi should be provided. Please make sure that all text in the Figures is readable - font size ≥ 8 pt. Figures and caption should be numbered and centered. Experimental results are presented in Figure 2.

3.1.2. Storage performance result

Figure 2 Storage performance result

4. Conclusions

The main conclusion of the study may be presented in a short Conclusions section, which may stand-alone. It should not repeat the Results, instead provide significant findings and contribution of the study.

Acknowledgments

Provide acknowledgements accordingly. List here those individuals or institutions who gave help, assistance during the research (e.g., providing grants, laboratory facility, writing assistance or proofreading the article, etc.). In case of the grants, please provide the number and year of the grant received.

References

These should be to accessible sources. Please ensure that all work cited in the text is included in the reference list, and that the dates and authors given in the text match those in the reference list.

IJJB adopts Harvard style for reference and citation in text. Authors can use various software to make it easier. For example, in Microsoft Word, you can follow [this tutorial](#) (not prepared by HJCS).
