Key Education Foundation is looking for a **Consultant!**

About KEF

Key Education Foundation (KEF) is a not-for-profit organisation that works to improve the quality of Early Childhood Education (ECE) for children.
We are on a mission to empower institutions, educators, and parents towards ensuring systemic transformation in ECE. We do this by directly implementing our programs in schools/anganwadis and through system-level partnerships at the state/district level to improve the early years'
ecosystem for young children.

About the Role

We are seeking a curriculum developer to support in reviewing and editing the Body Safety curriculum and the resources. The consultant will work closely with the product team and report to the Manager, Content. This role involves redesigning the curriculum and the resources using different tools.
Role: Consultant - Product
Duration: Jan - June 2026, Full time
Type of work: Hybrid
Location: Bengaluru
Stipend: Based on candidate's prior experience and skill set

Key Responsibilities

- Conduct classroom visits, engage in feedback collection with teachers, parents and children.and create reports to capture the insights.
- Engage in research-based design of activities for the Body Safety curriculum (ages 3–6), informed by learnings from the pilot study.
- Develop or improve teaching-learning materials for the Body Safety curriculum, using the organisation's design platforms and templates.
- Create a comprehensive teacher-training module to support effective implementation of the Body Safety curriculum in an early years classroom.
- Design a parent-engagement module for a workshop to build awareness and continuity of Body Safety practices at home.

Must Haves

- Strong oral and written communication skills in both Kannada and English.
- Proficiency in Google Suite and Canva for documentation, design, and content development.
- Prior experience in developing content development for early years and creating training modules for teachers and parents.
- Experience in teacher training (added advantage).
- Ability to coordinate and collaborate effectively with product and program teams.
- Understanding of child development (3-6 years), including learning needs, safety, and classroom practices.
- Occasional travel to schools.

What we offer

- Opportunity to connect with organisation, extended team and to explore further opportunities within the organization.

- Scope for expansion is available based on project

Application Process:
