## FAQs

- taken from random contact's questions -

*Can I publish the work you did for me in my site/blog/gallery/twitter/instagram/etc?*

- Of course!! I dunno why some people ask it after I send the final render. You pay me to draw, I do it, you get it, is yours! Anytime, anywhere.

*Why your PayPal invoice is too poor about info?*

- Because I'm paranoid. I've heard stories about PP interviewing customers and vendors transactions due explicit descriptions. I don't have a shit to hide but the last thing I need is having problems with my money so what needs to be explained is done via PM's or mail and keep the invoice too basic.

*What software do you use?*

- Sketchbook pro and Photoshop. Strip Design for building comics. Krita for 2D animation.

*Do you take requests or trades? What about gift art?*

- No. Producing art is what keeps us alive.

*I want a very accurate drawing but I don't want to pay for revisions. Why result is not what I wanted?*

- You answered yourself already. Art is not an accurate science like maths or robotics. By not paying for at least a revision you are giving me artistic freedom. I will guide myself according to the idea you give and I will do the best I consider. Also, artists love the fact customer sends a rough doodle of the idea so we have a more clear idea of what you want.

*Wanna RP?*

- *Once upon a time there was a handsome artisan tiger called Zibyr who needed money to survive and feed his clan of badass big cats, he didn't have the time to waste it with the other little tiny cute fluffy animals of the forest.*

*I don't have the money yet but can you consider my commission?*

- Even when now I offer partial payment, make sure you have the basic money before asking for a commission. The commission consultation takes a lot of my time and effort and it is very frustrating to spend all that time and finally not get paid. If you don't have money right now, save up for it for some time and come back later when you're ready to pay for the work and effort I'm giving you.

*Why can't I see a WIP of my project?*

- Time ago I offered one free revision for advanced projects, but I discovered making the base sketch, sending it and waiting for the feedback and back to the project broke my workflow making things slower. Anyway for more accurate results, or if you don't trust my skills, I'd encourage you to pay at least one revision.

*I want a simple sketch, why can't I have a revision?*

- Because it is ridiculous. If you want accurate results get a more advanced render level.

*Furry fandom is friendly so you should hold my own ways and obey me!*

- I'm not furry and I dunno about it, I just do my work on my own terms. You paid your project so you accepted this ToS. I don't oblige no one to rent my services.

*I bought a revision, Can I ask for changes or editions?*

- Sure, the thing is to keep it simple and not too extreme. The sketch I send to you is already approved by my standards of quality and I expect mostly your opinion of what you see rather than asking for redrawing the whole thing. That breaks my workflow.

*Can I chat with you via Telegram/Twitter? I wanna be your friend!*

- Hardly I will have a chat far from work and business. Yeah, everyone needs a friend. But don't look here for that. I'm sure there exist friendly beings that can match you.

*I don't trust paying to a stranger, How can I feel sure I will get my project?*

- I cannot speak for other people but at least in my case, I have like many seasons making commissions, one after the other and 99.9% of my satisfied customers have got what they paid for. I'm a professional artist, I care for my customers, my work, my time. I have success and work enough, also a well-gotten prestige to never have to steal your money. Everything here is about trusting. I don't know another way to agree on a project. If you know it, let me know!

*I don't use Google services, the reptoids are following me. Any other way to consider my commission request?*

- You can fill out the form even not being a google user. I rather use the forms because this way I can have a register of the projects I take and don't get lost or mixed. This helps me to have a better understanding and arrange the commissions I take. Beware the seductive reptoids, are the worst.

*I filled out your form but you rejected my project. Why do I feel miserable?*

- Filling out the form is not a compromise. I just analyze the info and rejecting a project have reasons which I will explain to you. Sorry if my answer feels harsh or rough but I'm honest. Anyway I like to take most of the projects!

*I want you to draw my whole life/story/novel/book! Why are you not considerate?*

- It's not me. By coming to ask for my services you know your idea, your budget already and by READING THIS ToS, you can have a better idea what to expect. I just ask what I consider fair for my time, effort and the size of the project.

*Can you make a discount?*

- No. I cannot go to the gas station and ask for discounts no matter how many times I've bought gas before.

*Where my convers/nike/puma/etc are?*

- I don't promote trademarks. I will make similar parodic versions instead.

*I've listened to your music, it's amazing! Are you taking music commissions?*

- No. Not interested in making music for someone else. However I'd be able to sell you any of my songs under my conditions and a decent price.

*My English is bad, Do you speak another language?*

- Español, Mexicano wey! y/h Tiger.

*Why do you make adult work?*

- Me and kitties were hungry. Morals cannot be eaten yet.

*What hardware do you use?*

- Wacom Cintiq 22HD
- iPad Pro 12.9" w/Apple Pen I
- MacMini M2, 8Gb
- ProArt PA279CRV Display
