Currency Analysis Template

After reviewing the exchange rates for the made-up countries, use the information in the table and what you learned in the lesson to answer the following questions.

Country and Currency Name	Today’s Currency Exchange Rate
Techtopia (Techtopian dollar, or TPA)	1 USD = 1 TPA
Crosswater (Crosswatering dollar, or CSW)	1 USD = 20 CSW
Nearland (Nearlandian dollar, or NRD)	1 USD = 5 NRD

1	In complete sentences, explain why a traveler will need to visit a currency exchange.

2	You have \$100 in the United States. Imagine you are visiting Crosswater to check out new products. How much would your \$100 be in Crosswatering dollars? (Be sure to show your work.)

3	You read about a new invention in Techtopia. You consider traveling there instead. How much would your \$100 be in Techtopian dollars? (Be sure to show your work.)

4	A computer part costs 200 TPA in Techtopia, and the same part costs 1,000 CSW in Crosswater. Figure out how much USD you need to buy the part from each country. (Be sure to show your work.)
200 TPA = USD	1,000 CSW = USD

To save this to your computer, click “File” on the top left corner of this page, then click “Download as” to select Word Document or Rich Text Format. Or click File and Make a Copy to use it as a Google Doc.

5	From which country, Crosswater or Tectopia, would the part be cheaper to purchase? Explain your answer by showing your work.

6	You buy certain supplies in Nearland. Last year, the currency exchange rate was 1 USD = 3 NRD. Are these supplies more or less expensive to buy now than last year? Explain your answer in complete sentences.
