Tips for New Eleyo Users

⭐Create your Eleyo account early!

Users can create an account, add children, and add emergency contacts prior to the date and time that registration opens.

Creating your account early saves time during the online registration process.

⭐Save a payment method in your account!

In order to complete the online registration, you must save a payment method in your Eleyo account.

Your payment method is stored securely and will not be charged until after our staff has reviewed and approved your contract.

Registration will not be complete and space will not be reserved without payment.
