

Below are the invitations for collaborations that you shared. Feel free to add others and reach out to the colleagues listed. *If email addresses are not listed here, please use the **Attendee Directory** to find them.*

If interested in GLOBAL Working Group, please reach out on [LinkedIn](https://linkedin.com/in/DrClaireANelson) <https://linkedin.com/in/DrClaireANelson> . We are setting up LinkedIn Group Right now It is just six of us - Three US - 2- Africa 1- Caribbean and 2 Research Assistants in Asia and Europe. Our next Webinar is with IFEEES in August. (Dr. Claire Nelson)

Scott Auerbach: I would love to collaborate to share best practices in sustainable STEM

Ingrid J. Paredes: Would love to connect with folks interested in bringing sustainability into first-year engineering courses and core curriculum!

Graig Marx: K-12 Engineering Challenges that Focus on Sustainability - marxg@winchesterthurston.org

Krishnanand Maillacheruvu: Yes, I am interested in collaborating on sustainable campus environments (including curriculum pieces)

Chandra Nath: K-12 school culture is very critical

Haritha Malladi: Also keen on finding collaborators in first-year engineering and sustainability education

Yakut Gazi: I would love to collaborate with folks to expand access to engineering thinking beyond engineering majors, for larger society (through open/online education)

Aaron Masuba: I would love to collaborate, Green Energy and Power efficiency in Sustainability Practices <https://www.linkedin.com/in/aaron-masuba-780313318/>

bill whitney: YES to collab in a centralized Pangolin comms database, and on ideas for curricular reform.

Sadan Kulturel-Konak: K-12 collaboration on sustainability and developing modules for training

Asim Williams: Thinking about how the raccoons idea can be applied to black girls code. Partners on that would be great!

Michelle Benavides: At International Society of Sustainability Professionals we are working with a network of universities on integrating sustainability fundamentals into curriculum! www.sustainabilityprofessionals.org

bill whitney: Shameless plug - watch your emails next spring for invites to our Impact-Focused Education Unconference at Lehigh University! go.lehigh.edu/ifeu

Mike McMeekin: I can help be a resource for collaborating with industry if needed.

David Ngojeh: Environmental Change and Health Plus -seek for partners for collaboration (ecahp2030@gmail.com)

Eli Patten: Open for collaborating on centralized resources and incorporating sustainability into ME capstone courses

Dr. Claire Nelson: Would love to work with those wanting to introduce foresight (futures literacy) into their senior/capstone/graduate curriculum. thefuturesforum@gmail.com

Ramiro Jordan Open to collaborations - rjordan@unm.edu - across silos and inter-institutional capstone efforts

Aaron Masuba [tompany/k4tlab/ https://www.linkedin.com/c](https://www.linkedin.com/company/k4tlab/) Open for Collaborations. Use Knowledge for Transformation

1Lisa Bosman Want to publish/disseminate your great sustainability focused teaching interventions? www.PurduePD.com

Asim Williams: 🙌 I can build the app for you!

Dauson Msumange: Open for collaboration on Eco-techs (through On-job Technical Training) dausonp@gmail.com
