...the dehumanization of Palestinians. Tishby promotes and profits off of false accusations of antisemitism...[~15 sec gap]...and genocide of the Palestinian people. That is exactly why UPenn has invited her to campus today as they bow to the Trump administration. They bow to Israel. The Israeli government itself sponsors Tishby's racist tirades across this country. Shame!

Previously a member of the Israeli government herself. Tishby has everything to gain from the Palestinians plight. After hundreds of thousands of Palestinians have been murdered, hundreds of thousands more injured and millions displaced, Tishby still proudly peddles the same October 7th propaganda to minimize the horrific reality of Israeli colonization and genocide.

...the past 540 days, Tishby has justified the repeated targeting of civilian neighborhoods, schools, and hospitals in Gaza. She has cheered on the IAF [Israeli Air Force], asking them for more destruction, more murder, and more torture. Shame! Her very existence as a settler on native Palestinian land, like all Israelis who pretend they have a real identity, is by nature murder.

In typical Zionist fashion, Tishby has supported and promoted the disappearance and kidnapping of Palestinians in Gaza and their allies in the United States. Shame! Tishby demands that the Palestinian people lay down and die, that they anguish in torturous Israeli prisons where they are beaten, assaulted, and murdered every single day. The genocidal freaks of Penn Hillel welcome these advocates for genocide. Shame!

Tishby, Noa fucking Tishby, is the keynote speaker of Penn's Israel Week during a genocide. Israel Week? Are you fucking kidding me? Noa Tishby's public presence serves only to manufacture consent for the genocide. Tishby has bragged that the people of Gaza will pay the price for their existence, insisting on the Israeli right to exterminate the Palestinian people. Shame!

She has toured the world, telling lies of sexual assault that have been disproven by the United Nations. Last week, I am looking at you dumb bitches over here, last week the United Nations put out a report confirming the systematic rape and torture of Palestinian prisoners, which you all cheer on like the pieces of shit you are...

How did the story progress? Western media and the genocidal idiots to the right of us—to the left of you guys [referring to the Jewish students]—tell the world that the resistance had bunkers underneath the hospital, as if the resistance is not stupid. And then necessitated burning it down. Many people, many people like these genocidal freaks next to us, believe this lie, but that belief was not harmless. Western society accepted the myth and what happened next? Every single hospital in Gaza has been targeted and bombed as a result of their genocidal lies. Shame!

As we watch Palestinians, Yemenes, Syrians, and Lebanese across the Arab world perish under Zionist bombs, remember Tishby's words, remember that Penn and Penn Hillel and these, I don't want to call them people, promoted them. I know Penn kids like to do their reading, so let's throw in some theory. In the words of revolutionary [Aimé Césaire](#), no one colonizes innocently. A nation which colonizes and a civilization, which justifies colonization, is already a sick civilization. Every Zionist and every settler living in the genocidal settler project that Hillel calls Israel is rotten to the core. Fundamentally, they believe that their identity is created by destroying indigenous life. It is the same, it is the same logic that this vile country was founded on, and the reason why the world we live in, one that allows a genocide to be livestreamed for over 500 days, can only be described as a sick civilization. Shame!

But despite this sickness, despite this sickness, there are moments of revolutionary fire, acts that should serve to inspire us all. On October 7, 2023, the Palestinian resistance in Gaza, demonstrated one of those moments. [Indecipherable] Gaza has been a besieged open air prison for the last 20 years. Most of the people inside children of displaced family members from the Nakba have never seen their hard ancestral land beyond the borders Israel constructed around them, shame. 17 months ago, Gaza broke the prison door, destroying the walls of the colonizer that aimed to hide the struggle of the Palestinian people from the rest of the world.

There are people inside that room today who are claiming to be victims of October 7. People who attended a music festival next to a concentration camp. They celebrate on land they obtained by murdering and displacing generations of Palestinians and the land will never accept them, shame. The likes of Noa Tishby and her team of genocidal ghouls staring at us over there riddle the history of Zionism and Israel Week. Are you kidding me? Fucking Israel Week? Penn's Israel Week. Much like the State of Israel, it will come to an end. There will not be another year, another week, or another day where genocide is celebrated in our city, shame.

Zionism cannot be grappled with. It cannot be discussed and it cannot be negotiated with. It must be destroyed. Long live the intifada! Long live the Palestinian resistance! And long live Al-Aqsa Flood!
