

On Friday of each week, we will be featuring student(s) and/or staff and different programs and opportunities in USD 289.

### Friday Eagle Feature

USD 289 has expanded student internships, enhanced individual plans of study, increased concurrent enrollment opportunities (college courses), and increased Career and Technical Education offerings and certifications (industry recognized certificates) over the past two years. This was done to assist students in identifying their passion, aligning it with a career and most cost effective method of post-secondary training. Our staff, community, parents, and students have all worked together to make this possible. Today Jaiden and Colby will share about their experiences and career pathways at WHS.

You can listen to their story [HERE](#)

Click [HERE](#) to go to our counselors webpage where additional information regarding these topics and opportunities are available.

**It's A Great Day to Be an Eagle!**
