JavaScript | HTML | CSS | React | Vue | NextJS | REST API | JSON | XML | PHP | Node | SQL | C# | .NET | OOP | Git | Jest | Playwright | TDD | Linux | Express | Smartsheet | Agile | Tailwind | Vercel | Figma | Salesforce |

Technical Projects

Salary-Capped | Front End Developer | (salary-capped.com) | 2023

(A Web Application for tracking and comparing NBA team payroll & player contracts.)

- **Tech Stack:** NextJS (React) and Tailwind CSS
- Developed Web Scraping API with Cheerio and NextJS SSR to fetch team & player data in real-time.
- Built a salary comparison feature for users to discover potential trades, league-wide.
- Currently implementing more features and functionality with a team of two.

Mugs-A-Million | Full Stack Developer/Lead Engineer | (github.com/dreamteamcapstone/mugs-ecom) | 2023

(A mock e-commerce web application focused on selling coffee vessels to consumers.)

- **Tech Stack:** React, CSS, ExpressJS, PostgreSQL, and JSON Web Token
- Pair-programmed with a team of three using agile development for a two-week sprint.
- Designed UX including product browsing and shopping cart that updates in real-time.
- Implemented an admin portal for adding and updating products and viewing orders.
