

Learning Places Fall 2022

SITE REPORT #2

name of site report

Save and submit your site reports on Blackboard as a PDF, please follow the following naming format: SiteReport#.LastnameFirstname

Select a meaningful image that captures your perception of the site we visited and provide a caption explaining what the image is.

STUDENT NAME:

SITE OBSERVATIONS

1. What are some general observations about the character of Brooklyn Bridge Park and the surrounding neighborhood? How does this space make you feel? What does it remind you of?
2. At Brooklyn Bridge Park, identify a space where you'd want to spend time if you were visiting this park to relax. Close your eyes for 2-3 minutes and feel your body in the space. Think about your sensory experiences: smell, sight, touch, sound. Describe your experience of this specific space in the park, why you selected it, and what it feels like.

3. This is a planned park...is it still nature? What elements seem natural vs. unnatural? Think about plants, water, land, and build structures.
4. How are people meant to interact with one another and with the environment in this park? Are there restrictions or rules that dictate how people interact with the park and each other? Describe specific spaces and structures in your response.
5. How does this park relate to the surrounding neighborhoods? Is it easy to access? Does it change the feeling of the neighborhood? What ecological or social functions might they serve for the surrounding community?
6. How does this park relate to the water? Think about spaces we observed where you can directly access the water and spaces where there is a barrier? Does water access matter? Are water barriers important?

Include 3 images that capture different types of spaces within the park that serve different purposes or are made for different audiences that you observed in this park. Please include descriptive captions!

QUESTIONS for FURTHER RESEARCH. These should follow directly from your analysis section and from the assigned readings (and the [2021 Comprehensive Waterfront Plan](#)). Your questions should be complex and specific enough to serve as the basis of a research project.

Questions might relate to architectural or environmental observations, ecological or socio-political problems and/or solutions, demography, history, land use (actual or potential), etc.

1. Question?

2. Question?

3. Question?

FURTHER RESEARCH

Choose and **revise** one of your questions for further research. Consider feedback from site report 1 as you revise your question.

Revised Research Question:

Find 1 *Newspaper Article, Academic Article, or Government Document* that addresses your **revised question**. Site the source in [APA Format](#). Respond to the questions below.

CITATION:

How does this source address all or part of your research question?

Write a 2-3 sentence summary of the source that captures the main ideas the author(s) present(s):

What is the purpose of the source?

Is the author an expert? What specialized information or research did the author need to have / conduct to write this source?

What further information would you need to answer your question?
