Patent Search Student Review

| Directions: Using a digital search tool like https://patents.google.com/ fill in the following spaces research a few inventions that are similar to your invention. This search process helps you know if your invention already exists and what inventions exist that are similar and will help you articulate how your invention is different. For example, there are many different mechanical pencils designs your goal is to find similar but different inventions. If you happen to find something exactly the same it's time to think about how you can improve your design to make it a true invention. | | | | |
