

1. Introduction/Establish discovery or goal of the demo
  - a. Slides 1-2
  - b. Introduce the company, the problem(s) we can solve, and how we'll fit into their current workflow.
  - c. Talk through step-by-step what they can expect to see
2. Teacher Dashboard; School Center; User Management
  - a. Slides 3-5
  - b. Teacher Dashboard
    - Homepage
    - This dashboard will be customizable over time and will have access to shortcuts at the top with easy access to manage classes or assignments.
    - The calendar widget will help you track when your assignments are due week to week and can be color-coded based on the assigned class.
  - c. School Center (User Management)
    - School Admins can import and manage students and teachers manually
    - Print log-in cards for your students
  - d. Class Management: Class Details
    - Teachers will go here to create classes
    - Set differentiated learning accommodations for students
    - View grade books, progress reports, or set up integrations
3. Accommodations and Integrations
  - a. Slides 6-7
4. Assessments and Assignment Center
  - a. Slide 8 (video)
  - b. This is where you create, assign and find assignments/assessments shared with you.
  - c. You have the ability to author your own questions using a variety of advanced item types.
  - d. Sharing is available at all levels. Teachers can create assessments to share within the grade level or department, school administrators can create school-based assessments and district administrators have the option to create assessments that can be administered district-wide.
  - e. Questions are arranged by domain and standard and include filters and sorting
  - f. Can create multiple activities and single assignments
  - g. Assignment messages can be added to assignments (video or text)
  - h. Our powerful assessment builder gives you the option to view all items in the database and hand pick the most appropriate items for your assessment. Items can be selected by standard, and we include the DOK level for all of our items.
5. NEW Technology-Enhanced Question Types
  - a. Slide 9
6. Instructional Resources
  - a. Slide 10-12

- b. Supplemental resources aligned to your state standards to use daily with your class
    - c. Bell ringers, Alien Arena, Class Activities, Supersheet
    - d. Printables, projector, and interactive
  - 7. Progress Monitoring with Reports (video)
    - a. Slides 13-14
    - b. District admins, School admins, Teachers, and students have access to their progress reports (*this functionality may not be available on Day 1*). Our progress reports include the option to track progress over time as students work toward standards-mastery.
    - c. Measure proficiency using our Dot Rank system
      - Use this information to provide remediation and identify gaps
      - Actionable dots provide individualized remediation
      - **Legend:**
        - 1. **Grey: No Data (less than 5 questions answered)**
        - 2. **Pink: <65%**
        - 3. **Yellow: 65%-85%**
        - 4. **Green: 86%-100%**
  - 8. Liftoff
    - a. Slide 15
    - b. Adaptive intervention for students in 2nd-8th grade to provide Tier 2 and Tier 3 instructional support. Students will be able to take diagnostic assessments in math and reading to determine their lowest skills gaps and quickly work their way back up to grade level. Liftoff is the piece of our platform that also integrates with NWEA MAP, and we will import the student's RIT scores into Liftoff to begin working on their identified skill gaps.
- 

## K-12 Student Dashboards (Menu):

Our K-12 Progress Learning platform grows, progress, and mature with the age of the learner.

### 9. K-1 Student Dashboard

- a. Slide 16
- b. Our K-1 students are engaged in different ways than the older students at the Elementary level. For this reason, we have designed a completely unique user interface for them. We provide read aloud to help anywhere there is text. The questions are a little different as well. The questions have larger font sizes, fewer

answer choices, and are automatically ready with read aloud with this purple speaker.

## **10. Elementary Student Dashboard (2nd-5th)**

- a. Slide 17
- b. Our elementary dashboard has a lot of engaging features built in like Galaxy Stars to unlock alien ranking cards, blasters, and rockets to use in the games. Students are only rewarded games during their practice if they answer a question correctly. If a student answers a question incorrectly, they are immediately provided remediation to clarify their learning and learn from their mistakes.
- c. Students receive personalized study plans to identify how they are growing in mastery of their state standards.

## **11. Middle and High School Dashboard**

Our Middle school platform will maintain that great standards-aligned content and will grow up a bit but not lose the engaging features, students will have token features as rewards.

As we progress to high school, we will maintain that subject-specific state standardized, standards-aligned content, and bring in things more age-appropriate. For high school learners as they prepare for post-secondary and prepare for progress beyond their high school years like ACT, SAT prep

- a. Slide 18
- b. Students can easily access their assignments from the assignments tab. They can view their assignments in a list or calendar view
- c. The graded work tab will show them all of their completed assessments and assignments along with the score. The results will show them how they did in all of the standards assigned in the assessment or assignment as well as all of the standards that they have scored less than 80% on and give them a chance to watch videos, work on vocabulary, and answer practice questions in their areas of focus. This is all done independently by the student and is just one of the tier 3 intervention strategies that they can practice on their side.
- d. The Practice tab is a favorite of our customers. Students can see the list of subjects for the classes they're in and also select from any that the school or district purchases. Their practice screen allows them to practice a variety of activities - videos, vocabulary, questions, or performance tasks based on the standard they've selected. They can track their progress with the dot rank indicator. This is huge for students because they are really motivated by seeing their dot colors change. It goes a long way towards building confidence. It's a great way for students to take part in their learning and see their own progress. Our schools love implementing our greendot challenge and challenging their students, classes, and even entire schools to get greendots. They may use a reward system like for every green dot you get a homework pass. This page is crucial as students can see where they are and create their own goals using this

page. Students can also access practice tests for subjects by selecting the option on the top left of the screen. Progress Reports are also available to view.

## 12. Teacher Support and Training

### a. Slide 19
