

VIDEO PRODUCTION BASICS

VIDEO PRODUCTION BASICS // VPA UC/CSU CAREER TECHNOLOGY ED // PATHWAY

Study film, the history of film, genres, filming techniques, photography, mise en scene and movement. Learn the basic skills of the video camera and video editing software while applying the fundamentals of design, composition and thematic organization. Learn the specialized vocabulary of the film and television industry and use it to express themselves clearly and concisely in their critiques of, television, film and each other's work. Students will develop ideas individually and within a group, develop pre-production skills by creating storyboards, shot lists and blocking. The production teams will film specialized projects to to grow their filmmaking skills. Individually, students will finish their work in the post production process, editing in Premiere Pro and After effects. Most important is the students study the art of filming through communication, collaboration, & problem solving. This is a skill that will help students in any area of work and life.
