

Making Challenging Decisions

Instructions: You are a group of supervisors at the Shur-Time Watch Company. You recently invested in new computer technology that helps workers create products faster. This means that you will have to eliminate at least one of your workers. Read the information and choose the person who will be let go (despedido). The fired worker will receive two week's notice (preaviso) and two week's extra pay.

Discuss:

1. What are the strengths and weaknesses of each worker?
2. Which worker would you fire? Why?
3. In case the company decides to fire more workers, who would be the next person to go?
4. Firing a worker is usually difficult because of the worker's personal circumstances. What will happen to Shur-Time's workers if they lose their jobs?
