

## AUSTRALIAN LIFESTYLE

I think this tournament is the Australian Open, one of the four Grand Slam tennis events of the year and this picture was taken in the final match because the court is full of people watching and enjoying the match. As we can see in this picture the final is being played by men so it's the men's single final but this grand slam is also played by women (single), men's and women's doubles and mixed doubles. This type of court is called fast because it's made by a hard material where the tennis ball when it bounces shoots faster, and this material is blue as we can see in that picture. I can remember the last winner of the men's single final who was Novak Djokovic. He defeated Andy Murray to maintain his world number-one ranking. This Grand Slam is one of the most famous and important event which occurs in Australia and is one of the pillars in Australian culture since thousands of tourists visit Melbourne to assist to this big event.
