

Advanced Eyecare Solutions

"Changing the way you see the world"

I am excited to announce a recent partnership with Treehouse Eyes, the leading pediatric myopia management organization in the nation. As part of this partnership, I have been certified to treat myopia in children.

I would welcome referrals or co-management with your practice for any children who may benefit from this treatment.

About Co-Management: Co-management is very straightforward. At the close of your patient's eye examination, you simply fill out a quick co-management form (attached here) If you use the paper form, make a copy and give it to the parent. Fax the original to us at **(425) 283-0440** or email it to **aesbellevue@gmail.com**. We will then contact the parent on your behalf to schedule their child's appointment. Should the parent move forward with treatment, we will send you a co-management fee of \$300. This fee also includes another visit at about six months. At that time there is one other short form (also attached) for you to fill out.

Other doctors co-managing with Treehouse Eyes doctors are reporting that parents are VERY appreciative of the referrals and the doctors concern for their kids' eye health. I'm confident the same thing will happen in your practice.

If you'd like to learn more about myopia management and Treehouse Eyes, please visit www.TreehouseEyes.com or <https://advancedeyecaresolutions.com/>

My staff will call your office in a few days to set up an appointment for a phone call to review the above with you and answer any remaining questions. I have included several supporting brochures and other documents in this folder.

Thank you in advance for your consideration and please reach out to my office with any questions.

Dr. Sarbjit Singh Virk, OD, PhD, FIAOMC
