

Sun Prairie Area School District

xello Overview

Why Xello?

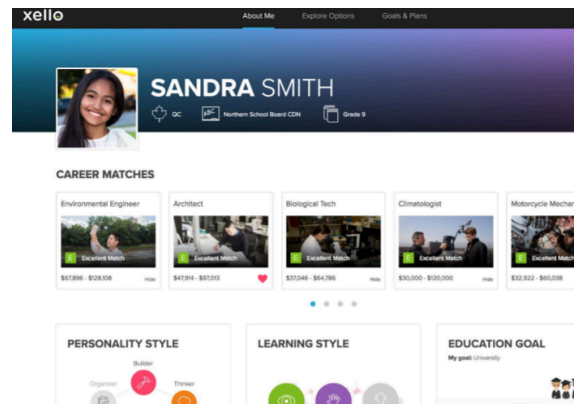

One important tool that will help students achieve our goal to graduate students college, career, and life ready, is through the use of an online post-high school exploration and e-portfolio tool. Xello, an upgraded version of Career Cruising, will be our post-high school plan platform and a place where students will house evidence of their growth towards our goal to graduate all students college, career, and life ready. Xello supports staff, students, and families to go deeper with students in supporting their path to college, career, and community readiness.

Imagine...

- Students and their families get a personalized post-high school and career exploration experience by using videos, interest assessments, and easy to use search filters.
- An organized, easy to use, e-portfolio where students can look back and find their best work samples from 6th-12th grade.
- Counselors and teachers are better equipped to personalize instruction by using reports on student interests, goals, and learning styles.
- More scholarship and program opportunities based on student interest profiles.
- New students feel welcomed as the student services team uses the student profile to get to know who they are and what they want to do.
- Course and program offerings tailored to trends in student aspirations and interests.

This year our students will use Xello in the following ways:

- Exploring high school, post-secondary, and career options
- Completing key artifacts and lessons
- Uploading high school and post-high school action plans and reflections

Questions?? Reach out to your student's Counselor or one of our high school College, Career, and Life Readiness Coordinators for more information.
