Abstract

Abstract tells the basic content of writing clearly and briefly, so it can be used as guidance for the readers in determining the level of relevance towards their need in a short time. ***Background****: Briefly describe the context or problem your work addresses.* ***Objective****: State the main aim or research question.* ***Methods****: Summarize how the study was conducted (design, tools, participants, or approach).* ***Results****: Highlight the key findings or outcomes.* ***Conclusion****: Present the main takeaway and its significance or implications. The abstract should 90 until 200 words longer. Abstract should be written in past tense and use standard nomenclature. It is suggested to use keywords that shows the knowledge field related to the research.*

(Justify, Times New Roman 10, single space, italic. Abstract contains of summary of the writing: introduction, objective, methods, the problem being discussed, approach or suggested solution and result of the solution and conclusion)

Keywords: *font; paper; format (Maximum 5 keywords)*

(*keywords written in small characters except abbreviation, 3-6 words, separated by commas, Times New Roman, 10, Italic*)
