

Day 6 Number Talks

<http://tinyurl.com/day6numbertalks>

Ground Rules

Everyone's voice matters. Be respectful when someone is giving their opinion.

Everyone will be asked to take risks and be uncomfortable. Being uncomfortable is OK. It is a part of growth and learning.

If you find one way to figure out the problem, then see if you can find a different way.

Try to think of a visual method of solving and explaining your solution. (If you are explaining it digitally then here are a couple of resources: <http://tinyurl.com/colordigital> <https://awwapp.com/> <https://webwhiteboard.com/>)

Once you are finished please create a solution at this site: <https://padlet.com/sladkey/day6numbertalks>

Simplify

$$34 \div 6$$
