

# **SQL Server Health Check Questionnaire**

Please provide detail on this page or another, for each of the following questions. No worries if you're not sure, please just provide as much as you can.

1. How many SQL Servers will be targeted within this Health Check?
2. What version of Microsoft SQL Server are you using?
3. What type of storage is in use with your servers? (local, external array, SSD, etc.)
4. What type of DR (Disaster Recovery) strategy are you using? (Cluster, Database Mirroring, Replication, Log Shipping, etc.)
5. Are you running any regular maintenance? Please describe.
6. Please provide detail regarding any immediate problems or concerns that you would like us to target specifically.
