

## April 2021 Global Dialog Webinar Discussion Templates

### Philosophy

*Advance Homework:* Students watch the [recording](#) of the [Solve Climate webinar](#) from your state, region or nation.

Minutes	Activity	Suggested Topics and Teaching Ideas
1-5	Instructor motivates the discussion and reviews the three recommendations.	
5-15	Break students into groups of three.	1. Which of the solutions that you just learned about seem to be most important in solving climate change? Why? 2. Do you support moving towards these solutions?
15-30	Report back and Discussion	
30-40	Back in groups of three	Taking action to stop climate change is the ultimate “drop in the bucket” problem: any one person or community can make only a small contribution to slowing global warming. Given this, from an ethical perspective, why should we act or not act?
40-55	Report back and Discussion	
55-60	Instructor observations and wrap-up
