

## Year 7: Music

### Learn and record yourself performing a piano piece using YouTube

There are lots of video tutorials for learning the piano on YouTube. Find one for a piece of music that you like and get playing! You can practice on the pianos at school before registration, at break and at lunch - just ask in the music office.

Guidance/key questions to ponder:

- Choose a piece of music that you enjoy so that you are more motivated to learn it
- Choose something difficult enough to challenge you but not so difficult that it is unachievable

Record yourself performing it when you are confident you can play it and upload to Google Classroom.
