The new locks have been installed for the church doors. There are 4 keys to the front doors. These keys will need to be monitored. The Master Code for the back door has been set. Council has voted to change the code to something less generic. Plan to have a spare key to the back door hidden in case the battery for the lock dies.

Painting the parking lot side of the church is estimated to cost \$1000. Council agrees to move forward with this painting project. Ken suggests that payment for the project be submitted with two checks under \$600.

Audrey will no longer be vacuuming the sanctuary. Will need to have a new sign-up sheet for this.

The congregation is requesting a paved or graveled parking lot. This is a future project, pending budget.

Request has also been made to re-paint the front and back doors. Either Bill will complete, or it will be included in Roger's Community Service Project.
