

~Googly Eye Bombing~

You've probably heard of photo bombing, but have you heard of eye bombing?! Eye bombing is the art of putting eyes on an inanimate object to humanize it (make it look like a person). The purpose of eye bombing is to have fun and look at your world in a different way! Can you find some interesting things inside or outside your house that would be great to eye bomb?!

[Link to My Video Explanation](#)

How to Eye Bomb your house...

- You will need eyes.
 - You can use googly eyes if you have them
 - OR you can make your own simple paper eyes by drawing a small black dot on your paper and cutting out around it.
- You will need small pieces of tape.
 - Check with a grown up to make sure you are using a tape that will not harm the surfaces in your home.
- Next, look around your house carefully both inside and out.
 - Does your doorknob need some eyeballs? A faucet? The cabinet door?
- Stick on your eyes!
- Do some more eye bombing! Take a photo and reuse your eyes somewhere else.
- What do you think? Does your humanized object need a talk bubble?! What would they be saying?!
- As always, I LOVE to see what you are doing at home. Feel free to share with me at kim.aucter@mmuusd.org and above all, HAVE FUN!
