

**Commander:** Bro Ken Wan in Broken Bounds  
**Project:** Guardian Lighthouse

**System:** SYNUEFE KU-F B44-4

I have been out in guardian space way too long. Listening. Watching. At least now there will be more people. Project Guardian Lighthouse could not come at a better time. My mind has been wearing thin from staring at spectrographs and binary readouts for weeks now. I thought we were getting somewhere with Chatterbox but now... I am not so sure.

In any case I arrived in system and spent the night at the beacon. All was fairly peaceful. When time came to activate all pylons powered on as expected, though it took at least 4 minutes for the last beacon to light. By 20:34 all of the beacons were lit and, just as expected, nothing significant happened.

**Experimental information:**

1 orb, 1 casket, 1 tablet, 1 relic, 1 urn 1, totem, 1 Ancient Key, 1 T of Fish 1 T of Onionhead Gamma, 1 T of beer ejected.

Coordinated scan of the orb conducted minutes after. Nothing notable.

Audio samples collected.

**Experimental Results:**

Fun was had. Nothing amazing happened.
