Updated 11/18/19

This is a half-day training for intervention specialists, special education administrators and related service providers who have experience administering the Alternate Assessment 1.0.

For 2020, the Alternate Assessment's format has changed. This training will focus on the 2.0 assessment, which will allow most students to test online. This training will also cover other ways students can take this assessment if they are unable to take the online version.
