

1. What are your plans for the future so that HIPPO will be more hype and the market will always be stable for the future? Will there be further token burns in the near future?

Our project is an exciting meme-token project with a large and friendly community, preparing for the release of an NFT collection and fun and interesting events for our participants. We pay a lot of attention to creating original meme content, fan art, videos, and events for the community. Our goal is to create an online space where people can spend time together, make friends, share memes, and, of course, discuss crypto.

In the future, we want to create a whole ecosystem and expand beyond just the meme-token \$HIPPO, as \$FLOKI has done, for example.

We plan to burn supply every 4 months, so \$HIPPO tokenomic has a deflation model making the token rare and every burn event adds a value to the token.

2. What about \$HIPPO token burning?

How many times have you burned tokens now? and is the \$HIPPO token burn transparent for your community?

We have a total supply of 777 trillion tokens. That's obviously a large number of tokens! In December, we burned 2% of the tokens, which is 15.7 trillion tokens (around \$150k), to make \$HIPPO a rarer asset and increase the overall percentage owned by existing holders. The price of HIPPO significantly rose after the token burn

Token burns will occur every 4 months. The next burn is scheduled for April. 🙄

The burn is absolutely transparent, here are the transaction of our first and latest supply burn:

<https://etherscan.io/tx/0x7919010de7a55b4d13dad1dadf9effd20e5e4da167bfebc7d58d38c84a5a85d7>

3. Where has EI HIPPO been registered ?

EI Hippo is already listed on CEXS: [BitGet](#) and [MEXC](#) and [UniSwap](#) DEX. Also, you can check out the token info and statistics on [CMC Community](#)

[Buy \\$HIPPO on UniSwap](#)

[Buy \\$HIPPO on BitGet](#)

[Buy \\$HIPPO on MEXC](#)

4. As long as I think Memecoin's success depends on the community, what is your strategy for managing the community to stay in El Hippo and want to work together to push the price of El Hippo to the Moon?

Our project is an exciting meme-token project with a large, friendly community preparing for the launch of an NFT collection and fun, interesting events for our members. We pay a lot of attention to creating original meme content, fan art, videos, and community events. Our goal is to create an online space where people can spend time together, make friends, share memes, and, of course, discuss crypto.

Our strategy for managing the community involves fostering a sense of inclusivity, transparency, and enthusiasm. We aim to keep the communication channels open, listen to the needs and ideas of our community members, and involve them in decision-making processes when relevant. We'll also organize engaging events, discussions, and activities to keep the community involved and motivated. And we always encourage an active community supporters.

We regularly hold giveaways, quizzes, and every month we launch Quest Sprints on the Zealy platform.

Additionally, we'll provide regular updates on the project's progress and milestones to keep the community informed and excited. Subscribe to El Hippo Newsletter: [El Hippo newsletter](#)

Together, we'll work towards pushing the price of El Hippo to the moon by building a strong, passionate, and informed community dedicated to the project's success. 🚀

5. How much supply \$HIPPO?

The initial \$HIPPO token supply is 777 trillion tokens. After the first burn event it is 761,3 trillions tokens now.

6. Do you have or plan to have a multi-chain for your token? If yes, then which networks do you plan to add, and how will this help?

Regarding the multi-chain for our token, we are actively working on this matter. We plan to add support for multiple networks to improve the accessibility of our token. We are currently considering second-layer networks like Arbitrum and Optimism. This will help users to utilize our token across different blockchains, optimizing fees and making it even more versatile.

7. Can you talk about the listed on candybomb on Bitget? and how the BitGet community can discover new communities to get involved?What does the future of EI HIPPO look like?

Our project is already actively [trading on BitGet](#), and in November, we held a large series of events with significant rewards for traders and active community members! We also made a charitable donation to the Hippo Protection Fund to help and honor the mascot we have chosen to represent our project. We love the energy that a hippo emits – massive and majestic. HIPPO IS BIG - our slogan. We will work to protect them to the best of our ability.

Of course, we plan to continue engaging in various activities with BitGet and are already actively collaborating. We believe that our partnership with BitGet will bring many amazing moments and provide community members with even more opportunities for fun and earnings! 🚀

8. With the inclusion of a bank transfer option for residents in specific countries, how does El Hippo ensure a seamless and secure process for users

making low-fee investments through this method, and what benefits does it offer, particularly for larger transactions?

Our partnerships help us expand our audience, offer participants new opportunities, and organize even more interesting events.

Our partner OnRamp Money has made it possible for members of our community to buy [\\$HIPP](#) through bank transfer literally in just a few clicks on our website!

Also, thanks to the recent partnership with IvendPay, you can now make payments with [\\$HIPP](#) in over 400 stores in 7 countries! You can find more details in this video:

 [IvendPay POS / How it works](#)

We have just partnered with CLS Global, a company that provides comprehensive consulting services in marketing/PR and market liquidity - leaders in their field. Their partnership with Floki Inu was a huge success, and we are looking forward to where our partnership will take us! 

We aim to collaborate with major and innovative partners to make our community even more unique.

9. I saw on the website that NFT holders get a [\\$HIPP](#) token allocation of 1%, what is the total NFT supply and how to get the NFT whitelist? Apart from that, does the team have any plans to list the coin on a new market in the near future?

This quarter, we are launching an NFT collection, and yes, the holders of these NFTs will receive 1% airdrop from the entire [\\$HIPP](#) supply   

The details about the total NFT supply and WLs distribution will be published on our socials soon:  [X \(Twitter \)](#) |  [Instagram](#) |  [Discord](#) |  [CMC Community](#) |  [Website](#)

Of course, active supporters will get the WLs first.

10. What I know is that **#EL HIPPO** is a meme project and usually meme projects are only popular and hype for a few months. How does the EL HIPPO team ensure that this is a long-term project and has good utility?

We launched El Hippo after noticing that the meme coin industry might have become a bit stagnant. Everywhere you look, there are similar themed mascots, and the joy of creating memes seems to have become less important than before.

We wanted to bring the community back to the original experience of meme sharing that was a few years ago, when content creation and easy online interaction were more important than the financial side of things!

El Hippo is taking a number of strategic steps to ensure the long-term value of its token and increase its demand and scarcity.

In addition to regular token burns and the launch of NFTs, we plan to list on top exchanges, launch a merch store, and are developing a Web3 game, so there's a lot of exciting stuff ahead! 🙄🙄🙄🙄

Soon, we are launching our [#makehipposgreatagain](#) movement, and it's not just about merch! Our idea is to raise funds to support charitable organizations that focus on conserving the hippopotamus population and protecting the environment. We will not take any profit from the sales, only cover the cost and add a percentage that will go towards helping animals and the environment. 🌍🦘 We genuinely want to make a contribution to biodiversity conservation and raise awareness about environmental issues. You can join us in this noble cause!

As for recent achievements, El Hippo has been added to MEXC and Bitget, received a lot of attention in the cryptocurrency media (we were even covered in CoinTelegraph

<https://cointelegraph.com/news/crypto-with-a-twist-the-rise-of-memecoins-with-el-hippo-interview>) and by crypto influencers.

El Hippo is essentially a social art project for the community, so our goal is to spend time together and share memes in the positive space that we are striving to create online.

Conclusion:

We are so glad that you joined our AMA session. It was great to answer your questions about our project El Hippo and discuss our plans for the future. I hope our conversation was useful and interesting for you! If you have any more questions, feel free to continue the conversation in the global chat of El Hippo <http://t.me/hipptalk>

Thank you for your participation and support! See you soon 🚀🦘🌟

Short summary:

WHAT \$HIPP IS:

- Smart contract: **0x7b744eea1deca2f1b7b31f15ba036fa1759452d7**
- Initial circulation: **777,000,000,000,000** tokens
- 15.7 trillion tokens have been burned (**2% of total supply**)
- Supply burning: every 4 months

What's next?

NFT collection is coming in Q2 '24

1% of total \$HIPP supply will be airdropped to \$HIPP NFT holders

[Buy \\$HIPP on UniSwap](#)

[Buy \\$HIPP on BitGet](#)

[Buy \\$HIPP on MEXC](#)

[Buy \\$HIPP with a bank transfer](#)

If you still didn't buy. We apologise.
