

# EXODUS PRESS RELEASE

## **ODYON debuts with first single “Exodus”**

“Exodus” marks ODYON’s debut, a dynamic, vocal-led indie dance / melodic techno track that grabs you from the first whispered hook. Deep, uplifting progressions build tension until a rolling, hypnotic drop takes over, driven by groove and low-end weight. Equally at home in its radio edit on streaming platforms and in its extended mix for late-night sets, it should resonate with fans of melodic techno and modern progressive house.

### **Track Reflection from ODYON:**

**“Exodus” is the first track I wrote as ODYON and the moment I allowed myself to follow what truly drives me. I imagined it as a bridge between everything I did before and the sound I want to build now. Whispered vocals, a melancholic but hypnotic mood, and energetic build-ups over a steady groove all come from that idea.**

**While writing it, I had images of a futuristic world in my head. “Exodus” is not a radical break from my past, but a first signal of where I want ODYON to go. That is why this track is very personal to me, and I hope listeners can feel that energy inside the music.**

ODYON is a European electronic live act rooted in indie dance, melodic techno and futuristic aesthetics. With over 150 performances worldwide and millions of streams from previous projects, ODYON is building a universe where music and visuals exist as one. The project was born from a desire to present electronic music in a clean, modern and visually strong way, where sound and visual design are fully connected into a single experience.

In a time when much of what we see feels virtual and generic, ODYON aims to create shows that are equally musical and visual, pushing the live format to its limit. Its world is made of transparency, reflections and liquid forms, precise and minimal yet full of energy and emotion. This idea of reflection points back to the listener, captured in the line: “Reflection of Sound.”
