

Hi Larry,

In your recent post about the "outside the box" tip for using FL Studio, I like how you said that you turned the volume down on the time section to gain back the rhythm a little bit.

I also like your idea on the 'Comment "Ya Charge Me"' gift as it significantly boosts your views on your posts. Clever tactic.

After looking at your videos, I noticed that your captions could be slightly altered to unlock their FULLEST potential.

By "potential" I mean gaining attention towards your **website** as I noticed that your viewers had a pretty long route to go from your DMS/captions to your website.

This long journey might make them forget about your website which won't bring exposure to your Mixing Secrets Course.

Now, Maybe you do upsell your bundles, courses, and keyboard after sending them your Presets but that won't make up for the other 6111 people who liked your video but **didn't** comment. *(Based on your latest Instagram post)*

So, I made 2 Instagram captions for you down below to help bring more attention to your courses.

Let me know if you like them,

Ryan Ho.
