

Yo G's, if you guys are reading this, I made this today. I need to spend more time on marketing research, but this is what I already made. I am in the brainstorming phase.

If you can tell me which copy you like more and what improvements I need to make, please let me know. I appreciate all the feedback.

Let's work!

Some reviews i found

GROEN IS POSITIEF

ROOD IS NEGATIEF

BLAUW IS GEVOEL

PAARS IS INTERESSANT

Hello everyone! I'd be closing on a newly built home in oct or nov and as soon as I move in I might have to travel in December. Since the home is in a new location and I'm not friends with any neighbors to watch my house I gotta install a security system as soon as I move in. What type or wiring is required and which security system should I be choosing? I'm clueless here please help me out. Thanks!

Vivinet and ADT come with onerous contracts, which is where they make their money. Stay away from them.

I self install Elk but that requires some skills.

Honestly can't say I'd recommend any of these. Before you get locked into a costly contract for a wireless system get a quote from a local company to hard wire a system. Less maintenance (batteries), and hardwired devices are universal so if you wanted to switch companies or set up self monitoring all of the hard work is already done. Plus hardwired systems are ALWAYS faster and more reliable.

I have my SimpliSafe and it has protected me from one break in. Gives me a little peace of mind.

How reliable are the motion detectives in the simply safe system most in detectors seem to be the the soft spot in a lot of home security systems that's where you get a lot of false alarms so how so how good are the motion detectives that eliminating false alarms okay thanks

Vivint = worst purchase I ever made.

Reliability = D

Product support = F

Run, don't walk, from these people!

Vivint has the worse customer service

I NOTICED YOU DIDNT MENTION WEATHER OR NOT THE VIDEOS THAT ARE STORED IF THEY ARE ABLE TO BE SEEN BY THE SERVICE PROVIDER OR DO THEY OFFER END TO END ENCRYPTION

AS TO ADT THEY ARE IN BED WITH GOOGLE WHICH MEANS YOUR PRIVACY IS NOT PROTECTED . KEEP GOOGLE OUT OF YOUR HOME

IM REALLY SUPRISED YOUR NOT FULLY INFORMATIONAL AND DISCUSS THE CONS AS WELL
