

**Key 10 in the Satoshi's Treasure Hunt is a human blockchain! Called the Clan Key, this key will be awarded to only one clan: the group that can mobilize its community to create the longest unbroken video blockchain by the June 15th deadline.**

**The Steem Community can do this! The ability to mobilize communities is one of Steem's greatest strengths. Join our human blockchain and let's win this one for Steem!**

## Sign Up for Your Block

1. Have both an active Steem account and a Twitter account visible to the public. Your Twitter account may be new, but your Steem account must be over 40 Reputation (or have someone who is be willing to vouch for you). You may only post the video blockchain once, so please do not attempt to use more than one account. Duplicate blocks will not be validated.
2. Sign up to participate in the Clan Chain by completing this form:  
<https://forms.gle/jW2ErcZ1tToZcBQ78>
3. Once we confirm that your Steem name and Twitter account are valid, you will be assigned a block number. Your block number may change depending on when you are ready to post, so please look for confirmation from us before posting.
4. You will be notified on Steem and on Twitter when there is an open block (or on Discord, if you are already a member of the Satoshi's Treasure Steem Clan). Please respond to confirm your block# before posting, to ensure our chain remains unbroken.

## Important: How to Correctly Format Your Block in the Video Blockchain

5. Ensure you have the correct link to a confirmed block in our chain (you have been notified by us, and the block meets all of the criteria below).
6. Record your video block. Your block must:
  - a. Have your face visible (sunglasses/headcovering ok but no obstructing your face),
  - b. Be making the Steem Clan hand gesture (a wave like the shape of the Steem logo),
  - c. Have a phone or other device playing the previous block's video clearly visible in your recording.
7. Tweet your video block. Your tweet must:
  - a. Include four correct hashtags #satoshistreasure #clanchain #steemclan and #(your block number)
  - b. Upload/attach your video block
  - c. Include a link to quote the previous block (do not simply reply/comment, the previous block must be linked below yours).
8. Please do not delete your block for the duration of this challenge (until June 16th), unless you are asked to do so by a Steem Clan administrator and you are certain that the chain has been forked. There has already been at least one attempt by a rival clan to defraud our chain, and there may be more!

**The longest unbroken chain will win the key, let's win it for Steem!**

If you are not already in the Satoshi's Treasure Steem Clan discord, consider joining. The discord is where we organize our efforts in the Satoshi's Treasure Hunt. Joining the discord is not necessary to participate in the video blockchain, only to participate in future Satoshi's Treasure Hunt activities. <https://discord.gg/j4EgET6>
