

- Insert photo in the document, and make sure you can move it around freely. The photo has to be in the background (behind all text, items, ...)
- Move your photo into the template
- Scale your photo to the desired dimensions
- Using the trimtool, crop and move the photo until it is centered.
 - *Cut the photo to the black border. A small part of the photo will be hidden behind white bars.*
- Print the page. Take a pair of scissors and cut the photo on the black borders.
 - *You can laminate the photo to give it a shiny style like a real picture!*
