

Kebron Cheru joins NGI as a Program Impact Officer Intern, supporting monitoring, documentation, data collection, and learning across the organisation's programmes. With a background in public health and practical experience in clinical and community-based settings, she brings strong skills in evidence gathering, case documentation, teamwork, and decision-making under pressure.

Kebron recently completed her Bachelor of Science in Public Health at Madda Walabu University and undertook clinical placements at Madda Walabu Goba Referral and Teaching Hospital and Dodola General Hospital. Her experience across emergency medicine, pediatrics, internal medicine, obstetrics and gynecology, surgery, and outpatient care has strengthened her ability to work with people facing complex and often urgent needs.

At NGI, Kebron applies her public health perspective and field experience to help strengthen programme quality, track results, and ensure that learning from implementation informs better services for survivors, returnees, and vulnerable communities. She is committed to using evidence to improve impact and advance dignified, survivor-centered solutions.
