Use of Artificial Intelligence

"Artificial intelligence" or "AI" is intelligence demonstrated by computers, as opposed to human intelligence. "Intelligence" encompasses the ability to learn, reason, generalize, and infer meaning. Examples of AI technology include ChatGPT and other chatbots and large language models.

AI is not a substitute for schoolwork that requires original thought. Students may not claim AI generated content as their own work. The use of AI to take tests, complete assignments, create multimedia projects, write papers, or complete schoolwork without permission of a teacher or administrator is strictly prohibited. The use of AI for these purposes constitutes Academic Dishonesty.

Students may not use AI, including AI image or voice generator technology, to violate school rules or school district policies.

In order to ensure academic integrity, tests, assignments, projects, papers, and other schoolwork may be checked by staff using AI content detectors and/or plagiarism recognition software.

Homeless Child's Right to Education
(McKinney-Vento Law/Displaced Youth)

When a child loses permanent housing and becomes a homeless person as defined by law, or when a homeless child changes his or her temporary living arrangements, the parent, guardian, or caregiver of the homeless child has the option of either:

> (1) continuing the child's education in the school of origin for as long as the child remains homeless or, if the child becomes permanently housed, until the end of the academic year during which the housing is acquired; or
> (2) enrolling the child in any school that non-homeless students who live in the attendance area in which the child or youth is actually living are eligible to attend.

For assistance and support for homeless families please contact the District 709 homeless liaison.
